Q U E S T I O N N A I R E

This questionnaire asks about your daughter now she is a toddler. We are interested to know about her health and behaviour and how she gets on with other children. Your answers will help us to understand the problems that toddlers and their parents have.

It is like the other questionnaires you have received. To answer simply tick the box which best describes your toddler or your toddler's situation. Again some questions will seem similar but they are not the same. Please answer all questions that you can. If you cannot answer any questions or if they do not apply to you please put a line through them. There are no right or wrong answers. Please just describe what happens in your situation. You may make additional comments at the end. All answers are confidential.

THANK YOU FOR YOUR HELP
