

Applied Data Science (COMSM0017) – Coursework

Sam James – Group 10 (Screen Time)

Mitigation Plan

Event/Issue	Impact on Project	Mitigation	Remaining Impact
Not being able to meet in person	Could no longer discuss points in person	Made use of online meetings, through Skype for Business	Having worked peer checked remained more difficult than usual
Multiple of the deadlines I had been set changed at the last minute	It meant that some of the time I had planned to be spending working on this project needed to be shifted to other pieces of work.	Adjusting the work plan I had made to allow for flexibility in this uncertain time.	I ended up spending less time on this project than I would have liked and staying up to date difficult at times.
