

Outline of data collected from Mother's clinic 1 (FOM1)

Physical measures

Height, weight, sitting height; arm, waist and hip circumferences; whole body and unilateral hip DXA scan; seated and standing resting blood pressure and pulse readings; ultra-sound scan of carotid intima media thickness (cIMT).

Biological samples

Fasting blood sample.

Other

The fieldworker asked validated questions on the Mother's menstrual cycle, reproductive health and use of hormones, as well as known allergies and medications being taken.
