Student no. 1618766

<b>Event/Issue</b>	<b>Potential/actual Impact on project</b>	<b>Action(s) taken to mitigate impact on project outcomes</b>	<b>Remaining impact</b>
Had to work with group fully remotely	Occasionally had difficulty implementing some technical features	Struggles mentioned at weekly skype meetings in order to get others' input. Pivoted to more research focused role of reading around field to detail avenues to be explored	
Had to meet with group and supervisor remotely	Sometimes difficult to arrange meetings with other members and could not code collaboratively	Attempted to use google colab to allow collaborative work Used skype to ensure that we would have at least a meeting per week. Used facebook messenger to try and keep in contact when full meetings could not be arranged	Google colab no longer provides collaborative read/write. This lead to difficulties when trying to work on tasks simultaneously.
