Introduction

This questionnaire was sent out only to female participants when they were approximately 19.5 years of age. Briefly, the questionnaire covers three main sections. Section A asked the respondent questions about bladder/urinary symptoms and how much they bothered them. These questions were taken from the International Consortium on Incontinence Modular Questionnaire (<http://www.iciq.net/>) Section B included questions about contraception, frequency of periods, whether they are a parent, and whether they are currently pregnant. There was then a set of questions regarding hirsutism (body hair) which included diagrams of various areas of the body with incrementally increasing amounts of hair for each area. With reference to what the respondent considers an abnormal amount of hair, they are asked to mark the most relevant diagram that corresponds to them self. A Modified Ferriman and Gallwey method (was used Finally, Section C collects the usual "back page" information on who completed the Questionnaire and when.

Collaborators and funders

The following table summarises the sections of the questionnaires together with the collaborator who requested inclusion and the funding body where appropriate:

Section	Topic/specific Measure	Collaborator	Funder
A	Bladder/urinary symptoms	Rufus Cartwright	International Urogynecological Association
B	Obstetric history Hirsutism	Hany Lashen (University of Sheffield)	Wellcome Trust

Questionnaire versions

Definition of the study sample

We regard as eligible all persons born to mothers resident in the former Avon area at the time they were born with the expected dates of delivery between 1.4.91 and 31.12.92.

Sample & response rates

There are a total of 15,458 records on this built file, with 1,944 completed questionnaires. This number is made up of the 14,676 fetuses in the core ALSPAC sample (regardless of whether or not the 19+ questionnaire was sent out for them or whether they were returned) plus 782 eligible children not in the core sample to whom the questionnaires were sent out. Note that this questionnaire was completed by 97 of these 782 children not in the core sample. Of the 14,676 fetuses in the core ALSPAC sample, 14,062 were live born. The 19+ questionnaire was sent out to 4,890 (35%) of these live born children. For further information on the ALSPAC sample, please see section 6 of the "Guide to ALSPAC data".

Note that, 4 of the 1,944 completed questionnaires belong to respondents from triplet or quadruplet pregnancies, all of whom are in the core sample. For reasons of confidentiality the data from these questionnaires are not available. ccxf0003a has been set to 2 "No" and all other variables have been set to -11 for triplets and quadruplets.

Format of this documentation

The bulk of this documentation consists of the text of the questionnaire as it was sent and frequency tables of the variables on the data file. These are inserted section by section after the relevant text. Where any editing has occurred a description has been added before the relevant frequency tables. The algorithms used to create derived variables are also included where appropriate.

Important note for *all* data users

Please note the supplied data is as completed by the participants, no logical edits or routing corrections have been made.

Variable information

New variables were created for Questions A19a, A19b, A19c, and A19d (A19Aa, A19Ab, A19Ba, A19Bb, A19Ca, A19Cb). These allow responses where boxes 1 and 2 have been ticked to be 'split', to show both responses. The original variable was set to 6.

Built file version history

Built version 1a – May 2014; the first version of the built file.

Release version 1b – July 2019; The 'yes' and 'no' value labels for variables ccxf2000 to ccxf2004 were incorrectly labelled (in that a value of 1 was coded as 'no', while 2 was coded as 'yes'). This has now been corrected (i.e., 1='yes'; 2='no').

FILLING IN THE QUESTIONNAIRE

Please use **black** pen. To answer questions simply put a cross in the box which is most accurate in your opinion, like this:

If you make a mistake, shade the box in like this:

then cross the correct box.

If you are answering questions which ask you to give further details, please make sure you write inside the boxes.

If you do not want to answer a question or if it does not apply to you, leave it blank. There are no right or wrong answers. Just tell us what is true for you.

THANK YOU FOR YOUR HELP

Section A: About your health

Many people experience bladder or urinary symptoms some of the time. We are trying to find out how many people experience bladder/urinary symptoms and how much they bother them. We would be grateful if you could answer the following questions, thinking about how you have been, on average over the PAST FOUR WEEKS.

A1. a) How often do you pass urine during the day?

- | | |
|------------------|----------------------------|
| 1-6 times | 1 <input type="checkbox"/> |
| 7-8 times | 2 <input type="checkbox"/> |
| 9-10 times | 3 <input type="checkbox"/> |
| 11-12 times | 4 <input type="checkbox"/> |
| 13 or more times | 5 <input type="checkbox"/> |

b) How much does this bother you?

Please cross a box numbered between 0 (not at all) and 10 (a great deal)

0 ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10 ☐
not at all **a great deal**

A2. a) During the night, how many times do you have to get up to urinate, on average?

- | | |
|--------------|----------------------------|
| none | 1 <input type="checkbox"/> |
| one | 2 <input type="checkbox"/> |
| two | 3 <input type="checkbox"/> |
| three | 4 <input type="checkbox"/> |
| four or more | 5 <input type="checkbox"/> |

b) How much does this bother you?

Please cross a box numbered between 0 (not at all) and 10 (a great deal)

0 ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10 ☐
not at all **a great deal**

Section B: About you

We want to examine the relationship between the levels of certain hormones in young women and heart disease risk in the future. These hormone levels are linked to how regular your periods are and how much body hair you have.

B1. Are you currently using:

	Yes	No
a) the oral contraceptive pill	¹ <input type="checkbox"/>	² <input type="checkbox"/>
b) the contraceptive injection (e.g. Depo-provera)?	¹ <input type="checkbox"/>	² <input type="checkbox"/>
c) a contraceptive implant under your skin (e.g. Implanon)?	¹ <input type="checkbox"/>	² <input type="checkbox"/>
d) a contraceptive coil with hormone (e.g. Mirena)?	¹ <input type="checkbox"/>	² <input type="checkbox"/>
e) a contraceptive patch?	¹ <input type="checkbox"/>	² <input type="checkbox"/>

The next question is going to ask you about how regular and long your menstrual cycles are. What we mean when we ask about length is the number of days between the first day of one period and the first day of the next period. So, for example, if the first day that you started bleeding on your last period was 7th May and the one before that was 10th April, the length of that cycle was 27 days.

B2. Are your periods regular?

Yes occur every 23 days or less	¹ <input type="checkbox"/>
Yes occur between 24 and 35 days	² <input type="checkbox"/>
Yes occur more than every 35 days	³ <input type="checkbox"/>
No	⁴ <input type="checkbox"/>

B3. What was the date of your last period?

(If you cannot remember the exact date please fill in as much detail as you can)
