Introduction

Background

This questionnaire was sent out to the study young people when they were approximately 25 years of age. It is in 14 sections:

Briefly, Section A asks the respondent about Being a Parent, and obtains details of any children born; Section B enquires about Strengths and Difficulties; Section C asks the respondent about Anxiety; Section D collects data on Healthcare and Accidents; Section E, Behaviour, asks how the respondent thinks and acts; Section F, Moods and Feelings looks into thoughts of sadness, depression and self-harm; Section G, Tanning and Sun Exposure, asks the respondent about tanning preferences; Section H enquires about Personality and ask how a respondent see themselves; Section I collects data on Employment; Section J asks the respondent how they may be affected by Life Events; Section L, Eating Behaviour, asks about patterns of eating and what may affect respondent's eating behaviour; Section M collects data on Food Preferences and finally, Section N collects respondent questionnaire completion date, and date of birth information. In addition, the partner/friend questionnaire asks the respondent about the behaviour and personality to the study young people.

Data Collection

The questionnaire was available to complete as either online or paper format. All participants were sent a letter or an email providing a username/password for the online version. Emails were sent to participants where an email address was available. Participants were emailed at the end of October and again at the beginning of November 2017. A series of reminders were sent in mid-November 2017. Further reminder emails were sent at the beginning of January 2018. Final reminder emails were sent at the end of January 2018, followed by a letter that arrived a few days after the email. Those, who were emailed but did not respond, were sent a paper copy of the questionnaire.

If no email was available, participants were sent a letter, which included a paper copy of the questionnaire. The first letter was sent in mid-November 2017. Reminder letters, with a new questionnaire booklet, were sent at the end of January 2018. Final reminder letters, with a new questionnaire booklet, were sent in mid-February 2018.

The Friend/Partner Questionnaire was available to complete as either online or paper format. All participants (YP) were asked to pass on a link to a friend or their partner. They could also request a paper copy. If no email was available, participants (YP) were asked if they wanted a paper friend questionnaire to pass on to their friend/partner, if so, the paper questionnaire was posted to YP. The Friend/Partner Questionnaire included questions

regarding YP's behaviour and personality. These questions have been included in the YP questionnaire.

Completed paper questionnaires were scanned into electronic data using Teleform data capture software. Data collection for the online questionnaires were collected and managed using REDCap (electronic data capture tools hosted at the University of Bristol (Harris et al., 2009).

Questionnaire versions

There was one version of the main questionnaire and there were small differences between the online and paper version. The online version has additional questions: YPE0124, YPE0125, YPE0126, YPE0127, YPE0129, YPE0130, YPE0131, YPE0132. Additional details of these questions are provided below.

There was one version of the Friend/Partner Questionnaire and there were small differences between the online and the paper version. The online version included an additional answer: "99= Don't know" for the variable YPE9818.

Sample and response rates

There are a total of 15,656 records on this built file with 4,398 having returned a completed questionnaire. This number is made up of 14,676 fetuses in the core ALSPAC sample plus 668 eligible children not in the core sample (regardless whether or not the Life @ 25+ questionnaire was sent out to them or whether they were returned). Note that this questionnaire was completed by 312 of these 668 children not in the core sample. Of the 14,676 fetuses in the core ALSPAC sample, 14,062 were live born. The Life @ 25 questionnaire was sent out to 9,995 live born children within the ALSPAC cohort (68% of all live born children).

As of 1st October 2018, 4398 completed questionnaires had been returned (44% of those sent). For further information on the ALSPAC 'Young People' sample, please see the cohort profile paper (Boyd et al., 2013). For confidentiality reasons, data for 4 triplet and quadruplet pregnancies has been coded as -11.

There are a total of 1,264 records on the Friend/Partner file (completed for 29% of the YPs who completed this questionnaire).

Format of this documentation

The bulk of this documentation consists of the text of the questionnaire as it was sent and frequency tables of the variables on the data file. These are inserted section by section after the relevant text. Where any editing has occurred, a description has been added before the relevant frequency tables. The algorithms used to create derived variables are also included where appropriate.

Free text responses are released separately, to be coded and returned before merging with any other data required. (See section 2.4 of the Access Policy). This will incur a small processing fee.

Introduction

This questionnaire is for completion by the original cohort participant, born between 1990 and 1993.

The data you provide will be available to approved researchers across the world and will help in answering important questions on human development, health and disease.

Confidentiality

Please remember that your answers to all these questions are confidential and will be processed using a unique ID number. All your personal details will be removed by Children of the 90s staff and researchers will not be able to link your answers back to you. Your data will only be shared with approved researchers for research that has been approved by Children of the 90s. This questionnaire has been approved by the Children of the 90s ethics and law committee.

Answering the questions

This year we have a lot of questions about mental health, mood and communication skills. This means that some questions may seem very similar to each other. This is because the combination of answers gives a clearer picture than one single answer. There may be questions that seem a bit strange or don't apply to you because they are about specific feelings or problems. We would be very grateful if you answered all the questions but we understand if there are some that you prefer not to answer or are unable to answer. Please just leave these questions blank. There are no right or wrong answers.

Help with completing the questionnaire

If you need help to complete this questionnaire, please contact us (details on the back page) and we will make the necessary arrangements. If you do not wish to complete this questionnaire, please leave it blank and return it to us in the prepaid envelope provided so we will know not to send you any reminders.

New tasks for this questionnaire

There are a couple of interesting new parts to the questionnaire this year. Once you have completed your own questionnaire, we would like you to ask a partner or friend to answer sections E and H about you too. You will not see their answers and they will not see yours. We have included some more information about this at the end of the questionnaire, on page 49.

Then, we will also ask you to complete two online tasks to measure your reaction time and mental agility. This involves clicking on a link to a website run by a company that we have employed to set up and run these tasks. As with all Children of the 90s activity, these data will be anonymous and confidential. The company will not have access to your personal details or any other information you have given Children of the 90s over the years. They will only be able to record your performance in the tasks. More information is included at the start of the tasks themselves.

Shopping voucher thank you

Thank you for taking the time to complete this questionnaire and its additional sections. To say thanks for taking part, we'll send you a £10 shopping voucher which you can spend online or on the high street.

Prize draw

Whether you return your questionnaire complete or incomplete, we will also enter you into a prize draw to win one of three iPad tablets. Because we are asking you to do more than usual we also have an extra prize draw for the friend questionnaire, with voucher prizes of £100, £50 and £20 each for both you and your friend if you both take part.

There is also another prize draw with the same prizes if you decide to complete the online cognitive tasks! There are more details at the end of the questionnaire.

To be entered into the prize draws we must have received your questionnaires/tasks by 5pm on 28th February 2018.

Filling in the Questionnaire

Please use a **black** pen. To answer questions simply put a **cross** (not a tick) in the circle/box which is most accurate in your opinion, like this:

If you make a mistake, shade the circle/box in like this:

then cross the correct circle/box.

If you are answering questions which ask you to give further details, please make sure you write inside the boxes. If possible, please use CAPITAL LETTERS.

When writing numbers inside boxes, please don't touch the sides of the box.

---	---

If you make a mistake when writing numbers inside boxes, please cross through the box and write your answer next to the box.

~~27~~ 28

Please read each question carefully. Some questions are very similar to others or refer to different time periods.

If you do not want to answer a question, or if it does not apply to you, leave it blank.

There is a blank space available at the back of the questionnaire if you need additional space. If you use this sheet, please clearly indicate the question number you are answering.

Section E: Behaviour- Questionnaire

Section E: Behaviour

This section is about your behaviour in different situations, both now and when you were a child. We have also included questions E3 to E5 in the partner/friend questionnaire we mentioned earlier.

- E1) Please select the answer that best describes your behaviour when you were a child, **between 7 and 12 years of age**. We know this was a long time ago, but please think back as best you can.

Section M: Food Preferences- Questionnaire

Section M: Food Preferences

On a scale of 1 (extremely dislike) to 9 (extremely like), please rate how much you like each of the foods and drinks listed below. The more you like the item, the higher you should rate it. The less you like the item, the lower you should rate it. If you are unfamiliar with, or have not tasted any of the foods, please cross "never tasted".

It is very important that you report how much you **like** each food, **not** how often you have it.

The variable YPE9670 indicates the 24 respondents for which 'Respondent's age in months when questionnaire completed' (YPE9660) and 'Respondent's age in years when questionnaire completed' (YPE9650) were based upon receipt date of their paper questionnaire, rather than completion date written in the questionnaire (YPE9540 and YPE9560). This would occur either if completion date was missing from the questionnaire, or completion date was incomprehensible. Respondent age at completion may therefore carry greater error for these individuals; although receipt date should only be a few days after completion date. However, if respondents completed a questionnaire then forgot to post it quickly, or if the returned questionnaire took a while to be scanned by ALSPAC, the receipt date may not match completion date.

The variable YPE9680 indicates the 323 respondents for which 'Respondent's age in months when questionnaire completed' (YPE9660) and 'Respondent's age in years when questionnaire completed' (YPE9650) were based upon the start date of their online questionnaire, rather than completion date for their online questionnaire. This would occur if completion date was missing from the online questionnaire. Partner/Friend Questionnaire- Questionnaire

Filling in the Questionnaire

Please use a **black** pen. To answer questions simply put a cross (not a tick) in the circle/box which is most accurate in your opinion, like this:

If you make a mistake, shade the circle/box in like this:

then cross the correct circle/box.

If you are answering questions which ask you to give further details, please make sure you write inside the boxes. If possible, please use **CAPITAL LETTERS**.

When writing numbers inside boxes, please don't touch the sides of the box.
