# Introduction

## Background

This questionnaire was sent out to the study young people when they were approximately 26 years of age. It is in 11 sections.

Briefly, Section A collects data on General Health; Section B considers wellbeing examining thoughts of happiness, life satisfaction and the meaning of life; Section C enquires about Physical Activity; Section D, Behaviour, asks how the respondent thinks and acts; Section E collects data on Monetary Choices; Section F asks the respondent about their Life Events and how these may have affected them; Section G asks the respondent about their Family and Fertility, and obtains details of any children born; Section H enquires about Unusual Experiences; Section I collects data on Education; Section J enquires about Attitudes to Data sharing; and finally, Section K collects respondent questionnaire completion date, and date of birth information.

## Collaborators and funders

The following table summarises the sections of the questionnaires together with the collaborator who requested inclusion and the funding body where appropriate:

Section	Topic/specific Measure	Collaborator name, (institution and ALSPAC project number)	Funding Source
A	Health	A1-7 Timpson A8-13 Leyland B3170	Wellcome/MRC
B	Wellbeing	B1-5 Timpson B6 Haworth B3168	Wellcome/MRC
C	Physical Activity	Timpson	Wellcome/MRC
D	Behaviour	MacKillop B3136	Internal McMaster funding
E	Monetary Choice	MacKillop B3136	Internal McMaster funding
F	Life Events	Timpson	Wellcome/MRC
G	Family and Fertility	Taylor B3159	US NIH
H	Unusual Experiences	Zammit B2172	MRC MR/M006727/1
I	Education	Morris B3169	
J	Attitudes to Data Sharing	Skatova B3021	

## **Data Collection**

The questionnaire was available to complete as either online or paper format. Participants were sent an initial invite email (with online questionnaire link) at the end of November 2018 and again in mid-December 2018. Participants were sent a letter (with online questionnaire link) in mid-December 2018. A further reminder letter, which included a paper copy of the questionnaire, was sent at the beginning of January 2019. Participants were sent a reminder text at the end of January 2019. Further reminder emails (with online questionnaire link) were sent in mid-February 2019. Final reminder emails (with online questionnaire link) were sent at the end of February 2019. Reminder letters (with online questionnaire link) were sent at the end of February 2019. Final reminder letters, with a new questionnaire booklet, were sent in mid-March 2019.

Completed paper questionnaires were scanned into electronic data using Teleform data capture software. Data collection for the online questionnaires were collected and managed using REDCap (electronic data capture tools hosted at the University of Bristol (Harris et al., 2009).

## **Questionnaire versions**

There was one version of the main questionnaire and there were small differences between the online and paper versions. The possible responses for the variables: YPF3080, YPF3090, YPF3100, YPF3110, YPF3120, YPF3130, YPF3140, YPF3150, YPF3160, YPF3170, YPF3180, YPF3190, YPF3200, YPF3210 for the paper version went from 0-6 and the online version from 1-7. The answers for the variables YPF7030, YPF7060 and YPF7090 for the paper version went from 1-5 and the online version from 0-4.

## **Sample and response rates**

There are a total of 15,659 records on this built file with 4,462 having returned a completed questionnaire. This number is made up of 14,676 fetuses in the core ALSPAC sample plus 982 eligible children not in the core sample (regardless whether or not the Life @ 26+ questionnaire was sent out to them or whether they were returned). Note that this questionnaire was completed by 321 of these 982 children not in the core sample. Of the 14,676 fetuses in the core ALSPAC sample, 14,062 were live born. The Life @ 26 questionnaire was sent out to 9,230 live born children within the ALSPAC cohort (66% of all live born children).

As of 1<sup>st</sup> October 2019, 4462 completed questionnaires had been returned (48% of those sent). For further information on the ALSPAC 'Young People' sample, please see the cohort profile paper (Boyd et al., 2013). For confidentiality reasons, data for 5 triplet and quadruplet pregnancies has been coded as -11.

## **Format of this documentation**

The bulk of this documentation consists of the text of the questionnaire as it was sent and frequency tables of the variables on the data file. These are inserted section by section after the relevant text. Where any editing has occurred, a description has been added before the relevant frequency tables. The algorithms used to create derived variables are also included where appropriate.

Free text responses are released separately, to be coded and returned before merging with any other data required. (See section 2.4 of the Access Policy). This will incur a small processing fee.

# Introduction

**This questionnaire is for completion by the original cohort participant, born between 1990 and 1993.**

The data you provide will be available to researchers across the world and will help in answering important questions on human development, health and disease.

## **Confidentiality**

Please remember that your answers to all these questions are confidential and will be processed using a unique ID number. All your personal details will be removed by Children of the 90s staff, and researchers will not be able to link your answers back to you. Your data will only be shared with approved researchers for research that has been approved by Children of the 90s.

## **Answering the questions**

Some questions may seem very similar to each other. This is because the combination of answers gives a clearer picture than one single answer. There may be questions that seem a bit strange or don't apply to you because they are about specific feelings or problems. We would be very grateful if you answered all the questions but we understand if there are some that you prefer not to answer or are unable to answer. Please just leave these questions blank. There are no right or wrong answers.

## **Help with completing the questionnaire**

If you need help to complete this questionnaire, please contact us (details on the back page) and we will make the necessary arrangements. If you do not wish to complete this questionnaire, please leave it blank and return it to us in the prepaid envelope provided so we will know not to send you any reminders.

## **Helplines**

If you are affected by any of the issues raised in this questionnaire, there are a number of organisations listed on the helplines page at the back of this booklet.

### **Shopping voucher thank you**

Thank you for taking the time to complete this questionnaire. To say thanks for taking part, we'll send you a £10 shopping voucher which you can spend online or on the high street.

### **Prize draw**

Whether you return your questionnaire complete or incomplete, we will also enter you into a prize draw to win one of three iPad tablets.

To be entered into the prize draw we must have received your questionnaire by **5pm on 5th April 2019**.

If you win, we will contact you within two weeks using the contact details on our database. You can update these online at:

**[childrenofthe90s.ac.uk/update-your-details](http://childrenofthe90s.ac.uk/update-your-details)**

Alternatively, you can contact us using the details at the back of this questionnaire.

You will receive your prize up to six weeks after the draw has been held.

## **Filling in the Questionnaire**

Please use a **black** pen. To answer questions simply put a **cross** (not a tick) in the circle/box which is most accurate in your opinion, like this:

If you make a mistake, shade the circle/box in like this:

then cross the correct circle/box.

If you are answering questions which ask you to give further details, please make sure you write inside the boxes. If possible, please use CAPITAL LETTERS.

When writing numbers inside boxes, please don't touch the sides of the box.

Please read each question carefully. Some questions are very similar to others or refer to different time periods.

If you do not want to answer a question, or if it does not apply to you, leave it blank.

There is a blank space available at the back of the questionnaire if you need additional space. If you use this sheet, please clearly indicate the question number you are answering.

**Pain can affect muscles, ligaments, joints and other organs, and we are interested in any type of pain you experience. We would like to understand where you have pain, how frequently you experience it and how much pain impacts your everyday life. Some conditions involving pain begin early in life and others can develop with age, and this questionnaire will help us better understand people's pain experience at this stage of life.**

- A8) Have you had any aches or pains that have lasted for a day or longer **in the past month**?

Yes  1    No  0     If no, please go to question A13 on page 8.

## Section B: Wellbeing- Questionnaire

### Section B: Wellbeing

We would now like to ask some questions about your positive mental states such as happiness, life satisfaction, and meaning in life. By understanding more about what causes wellbeing as well as mental illness, we can understand how to promote health better.

- B1) For each of the following statements and/or questions, select the answer that you feel is most appropriate in describing you.

	Not a very happy person			A very happy person			
	1	2	3	4	5	6	7
a. In general, I consider myself:	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	Less happy			More happy			
	1	2	3	4	5	6	7
b. Compared with most of my peers, I consider myself:	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- B2)a. Some people are generally very happy. They enjoy life regardless of what is going on, getting the most out of everything.

	Not at all			A great deal			
	1	2	3	4	5	6	7
To what extent does this characterisation describe you?	<input type="radio"/>						

- b. Some people are generally **not** very happy. Although they are not depressed, they never seem as happy as they might be.

	Not at all			A great deal			
	1	2	3	4	5	6	7
To what extent does this characterisation describe you?	<input type="radio"/>

## Section G: Family and Fertility- Questionnaire

### Section G: Family and Fertility

In this section we want to ask you some questions about having children and becoming a parent. We realise that some people have problems becoming pregnant or a parent. Other people do not want children. We would like to find out as much as we can about your current children and plans for the future. This will help us to understand what things affect some people being able to become pregnant (or a parent) at a time that they want to, whereas for others this is harder. Please complete as many of the questions as you can.

#### Technical terms used in these questions:

##### **Natural conception:**

Pregnancy achieved through sex between a man and a woman without medical intervention.

##### **IVF (in vitro fertilisation):**

A process of fertilisation where an egg is combined with sperm outside the body and the resulting embryo subsequently transferred into the uterus.

##### **ICSI (intra cytoplasmic sperm injection):**

A type of IVF in which a single sperm cell is injected directly into the egg and the resulting embryo then transferred into the uterus.

##### **Other ART (Assisted reproductive technology):**

Technology used to achieve pregnancy not including IVF/ICSI. This would include use of hormones to stimulate ovulation without IVF/ICSI, use of donor sperm without IVF/ICSI and intrauterine insemination (IUI).

##### **Surrogacy:**

When a woman agrees to carry a pregnancy for another person or persons.

##### **Adoption:**

When a person legally assumes the parenting of a child who is not their biological child.

## Section J: Attitudes to Data Sharing - Questionnaire

### Section J: Attitudes to Data Sharing

In this section we are not asking you to share any data; we only want to know your thoughts on us possibly asking in the future.

Digital technology is opening up a new era in the understanding of individual choices and decision-making. An ever-increasing amount of digital information is generated as we go through our daily lives. Being able to combine this information with medical, genetic and lifestyle information you already helped us collect will allow us to understand more about choices and everyday behaviours. This would allow us to investigate important research questions such as, how spending patterns affect wellbeing and mental health, and whether eating habits contribute to obesity and diabetes.

**Supermarket card data:**

Information about your purchases in a specific shop exactly like it appears on your receipt.

**Banking data:**

All information about your spending just like it appears on your bank statement.

**Activity Tracker data:**

Information from wearable devices and apps that can include location data, step counts, movement data.

J1) Do you own supermarket loyalty cards?

*Please only include cards that are registered to you, not any that you use and are registered to someone else.*

The variable YPF9910 indicates the 15 respondents for which 'Respondent's age in months when questionnaire completed' (YPF9520) and 'Respondent's age in years when questionnaire completed' (YPF9510) were based upon receipt date of their paper questionnaire, rather than completion date written in the questionnaire (YPF9021 and YPF9022). This would occur either if completion date was missing from the questionnaire, or completion date was incomprehensible. Respondent age at completion may therefore carry greater error for these individuals; although receipt date should only be a few days after completion date. However, if respondents completed a questionnaire then forgot to post it quickly, or if the returned questionnaire took a while to be scanned by ALSPAC, the receipt date may not match completion date.

**YPF9910 DV: Date of completion replaced with date of receipt for Paper Questionnaires**

		Frequency	Percent	Valid Percent	Cumulative Percent

The variable YPF9920 indicates the 282 respondents for which 'Respondent's age in months when questionnaire completed' (YPF9520) and 'Respondent's age in years when questionnaire completed' (YPF9510) were based upon the start date of their online questionnaire, rather than completion date for their online questionnaire. This would occur if completion date was missing from the online questionnaire. Respondent age at completion may therefore carry greater error for these individuals; although start date should only be a few days after completion date.
