Introduction

Background

This questionnaire was sent out to the study young people when they were approximately 24 years of age. It is in 11 sections:

Briefly, Section A asks the respondent about their Life Events and how they may have affected them; Section B enquires about Being a Parent, and obtains details of any children born; Section C asks about Communication Skills, how the respondent engages with others, and how they behave in certain situations; Section D collects data on Monetary Choices; Section E, Behaviour, asks how the respondent thinks and acts; Section F, Deliberate Self-Harm, looks into thoughts of suicide, whether a respondent hurts themselves on purpose and possible reasons why; Section G, Smoking and E-Cigarette Use, asks about patterns of smoking over time and the use of e-cigarettes; Section H, collects data on Eating Behaviour, how respondents eat, and what might affect their eating behaviour; Section I, Gambling, asks about the types of gambling the respondent may have participated in, and other behaviours associated with gambling. Section J asks the respondent about Social Media usage and finally, Section K collects respondent questionnaire completion date, and date of birth information.

Collaborators and funders

The following table summarises the sections of the questionnaires together with the collaborator who requested inclusion and the funding body where appropriate:

Data Collection

The questionnaire was available to complete as either online or paper formats. All eligible participants were first sent a letter in mid-November 2016 providing details about the online questionnaire (a paper questionnaire was not enclosed with this initial invite). Participants who did not return their online questionnaire then received a paper version in early December. Reminder letters and emails were then sent to non-completers in mid-January 2017. Finally, further paper versions of the questionnaire were sent again at the end of January and towards the end of February. Completed paper questionnaires were scanned into electronic data using Teleform data capture software. Data collection for the online questionnaires were collected and managed using REDCap electronic data capture tools hosted at the University of Bristol (Harris et al. 2009)

Questionnaire versions

There was one version of the main questionnaire, although the online version also collected data on COCO's (Children of the Children of the 90s), and there were some small differences between the online and paper versions. The online version included the additional questions: YPD2032c, YPD2033, YPD2034, YPD2035b, YPD2035c, YPD2036, YPD2037. Additional details of these will be given alongside the relevant questions below.

Sample & response rates

There are a total of 15,571 records on this built file with 4,350 having returned a completed questionnaire. This number is made up of the 14,676 fetuses in the core ALSPAC sample plus 895 eligible children not in the core sample (regardless of whether or not the Life @ 24+ questionnaire was sent out to them or whether they were returned). Note that this questionnaire was completed by 309 of these 895 children not in the core sample. Of the 14,676 fetuses in the core ALSPAC sample, 14,062 were live born. The Life @ 24+ questionnaire was sent out to 9,217 live born children within the ALSPAC cohort (66% of the total sample). As of 1st December 2017, 4,435 completed questionnaires had been returned (48% of those sent). For further information on the

ALSPAC 'Young People' sample, please see the cohort profile paper (Boyd et al., 2013).

Note that 1 of the 4,435 completed questionnaires belonged to a child from triplet or quadruplet pregnancies, who is in the core sample. For reasons of confidentiality the data from this questionnaire is not available. All variables have been set to -11 for triplets and quadruplets.

Format of this documentation

The bulk of this documentation consists of the text of the questionnaire as it was sent and frequency tables of the variables on the data file. These are inserted section by section after the relevant text. Where any editing has occurred a description has been added before the relevant frequency tables. The algorithms used to create derived variables are also included where appropriate.

Introduction

This questionnaire is for completion by the study young person.

The data you provide will be available to approved researchers across the world and will help in answering important questions on human development, health and disease.

Please remember that your answers to all these questions are confidential and will be processed using a unique ID number. All your personal details will be removed by Children of the 90s staff and researchers will not be able to link your answers back to you. Your data will only be shared with approved researchers for research that has been approved by Children of the 90s.

Some questions may seem very similar to each other. This is because the combination of answers gives a clearer picture than one single answer. There may be questions that seem a bit strange and are not applicable to you because they are about specific feelings or problems. We would be very grateful if you would try to answer all the questions but we understand if there are questions that you either prefer not to answer or are unable to answer. Please just leave these questions blank. There are no right or wrong answers.

If you need help to complete this questionnaire, please contact us (details on the back page) and we will make the necessary arrangements.

If you do not wish to complete this questionnaire, please leave it blank and return it to us in the prepaid envelope provided. We will then know not to send you any reminders.

Thank you for taking the time to complete this questionnaire. To say thanks for taking part, we'll send you a £10 shopping voucher which you can spend online or on the high street. Whether you return your questionnaire complete or incomplete, we will also enter you into a prize draw to win one of three iPad Air 2 tablets.

To be entered into the prize draw we must have received your questionnaire by 5pm on 14th March 2017. If you win, we will contact you within two weeks using the contact details on our database. You can now update these online at childrenofthe90s.ac.uk/update-your-details. You will receive your prize up to six weeks after the draw has been held.

Filling in the Questionnaire

Please use a **black pen**. To answer questions simply put a cross (not a tick) in the circle/box which is most accurate in your opinion, like this:

If you make a mistake, shade the circle/box in like this:

then cross the correct circle/box.

If you are answering questions which ask you to give further details, please make sure you write inside the boxes. If possible, please use CAPITAL LETTERS.

When writing numbers inside boxes, please don't touch the sides of the box.

2	7
---	---

If you make a mistake when writing numbers inside boxes, please cross through the box and write your answer next to the box.

 2 8

Please read each question carefully. Some questions are very similar to others or refer to different time periods.

If you do not want to answer a question, or if it does not apply to you, leave it blank.

There is a blank space available at the back of the questionnaire if you need additional space. If you use this sheet, please clearly indicate the question number you are answering.

Section D: Monetary Choice: Questionnaire

Section D: Monetary Choice

The value some people place on an amount of money depends on when they will receive it. We think this may be partly influenced by your genes.

Please answer the questions honestly, as though you were going to actually receive the money mentioned with each choice.

Please cross one answer on each line, next to your preferred choice, like this: 

Which would you rather have?

Section D: Monetary Choice: Frequencies

Delay was assessed using the Monetary Choice Questionnaire (Kirby et al., 1999), which has been extensively validated and used pre-configured choices between smaller amounts of money available immediately and larger delayed amounts of money. The MCQ has been extensively used and validated previously (cited >1200 times) and a recent meta-analysis determined effect sizes from the MCQ were statistically equivalent to extended decision making tasks (Amlung et al. in press)

Section E: Behaviour

There are a number of statements below that describe ways in which people act and think. Please indicate how much you agree or disagree with each statement.

Please cross through circles like this: 

		Agree strongly	Agree somewhat	Disagree somewhat	Disagree strongly

Section F: Deliberate Self-Harm- Questionnaire

Section F: Deliberate Self-Harm

This section is about thoughts of suicide and hurting yourself on purpose, which is also sometimes referred to as deliberate self-harm. We know this is a sensitive subject that we have asked you about before but it is important to ask about it again now as it is not uncommon. By finding out about self-harm we can try to find ways to help people. There are helplines available at the end of this section and at the back of the questionnaire.

- F1) Have you ever hurt yourself on purpose in any way (e.g. by taking an overdose of pills or by cutting yourself)?

Yes 1 No 0 → If no, please go to question F5

- a. If yes, how many times have you done this in the last year?
Please cross one answer only.

None 0 Once 1 2-5 times 2
6-10 times 3 More than 10 times 4

- F2) Have you ever hurt yourself on purpose (e.g. by taking an overdose of pills or by cutting yourself), without intending to kill yourself?

Yes 1 No 0 → If no, please go to question F3

- a. If yes, when was the last time you hurt yourself on purpose, without intending to kill yourself? Please cross one answer only.

Section J: Social Media - Questionnaire

Section J: Social Media

We'd like to ask you some questions about social media, by which we mean using websites or apps to connect with other people through activities such as posting/reading messages, using 'chat' functions within games, sharing photos/videos, reading/posting comments, or choosing to 'follow' or 'friend' other people. Social media sites or apps require users to create a profile or account to find and connect with other users. These are an important part of some people's lives and there is a growing field of research in this area.

Please cross through circles like this: 

J1) Do you have a social media profile or account on any sites or apps?

Yes 1 No 0  If no, please go to section K

The variable YPD9750 indicates the 21 respondents for which 'age at completion' (YPD9650) was based upon receipt date of their paper questionnaire, rather than completion date written in the questionnaire (YPD9600 and YPD9601). This would occur either if completion date was missing from the questionnaire, or completion date was incomprehensible. Respondent age at completion may therefore carry greater error for these individuals; although receipt date should only be a few days after completion date. However, if participants completed a questionnaire then forgot to post it quickly, or if the returned questionnaire took a while to be scanned by ALSPAC, the receipt date may not match completion date.
