Introduction

Background

This questionnaire was sent out to study the study young person's when they were approximately 23 years of age. It is in 13 sections:

Briefly, Section A asks the respondent about Social Media usage; Section B enquires the respondent about their Sexual Experience and activity; Section C asks about Wellbeing, questions about happiness, life satisfaction, and meaning of life; Section D collects data on Eating Behaviour, how respondents eat, and what might affect eating behaviour; Section E, Being a Parent is interested in how the respondents family may be expanding; Section F, Brothers and Sisters enquires about family structure, including biological, half, step, foster, and adopted siblings; Section G, Smoking and E-Cigarette Use asks about patterns of smoking change over time and e-cigarettes; Section H, Mental Health collects data on how the respondent may have been feeling or acting recently; Section I, Traumatic Experiences enquires how the respondent is treated by others, and how they treat others, different types of bullying, and traumatic experiences; Section J, Teeth is interested in the health of the respondents teeth and mouth; Section K, Life Events enquires on events that may have changed the respondents life in a major way; Section L, Education and Employment, is interested in the respondents employment education and training; finally, Section M collects the usual "back page" information on when the Questionnaire was completed.

Data Collection

The questionnaire was available to complete in online or paper format. All eligible participants were first sent a letter in mid-November 2015 providing details that the online questionnaire was active (a paper questionnaire was not enclosed with this initial invite). Participants who did not return their online questionnaire then received a series of up to four reminders at three-week intervals: the first reminder contained a paper version of the questionnaire for individuals to complete alongside a reminder letter; the second reminder was a letter and an email; the third reminder contained another paper version of the questionnaire alongside another reminder letter; the final reminder consisted of a further paper questionnaire. Completed paper questionnaires were read in using Teleform data capture software. Data collection for the online questionnaires were collected and managed using REDCap electronic data capture tools hosted at the University of Bristol.

Questionnaire versions

There was only one version of this questionnaire, although there were some small differences between the online and paper versions. The online version included the additional questions: YPC1060, YPC1067, YPC1068, YPC1230, YPC1231, YPC1233, YPC1234, YPC1240, YPC1241, YPC1242, YPC1243, YPC1244, YPC1250, YPC1251, YPC1252, YPC1253, YPC1254, YPC1260, YPC1261, YPC1262, YPC1263, and YPC1264. Additional details of these will be given alongside the relevant questions below.

Sample & response rates

There are a total of 15,573 records on this built file with 4,222 having returned a completed questionnaire. This number is made up of the 14,676 fetuses in the core ALSPAC sample plus 897 eligible children not in the core sample (regardless of whether or not the Me @ 23+ questionnaire was sent out to them or whether they were returned). This questionnaire was completed by 309 of these 897 children not in the core sample. Of the 14,676 fetuses in the core ALSPAC sample, 14,062 were live born. The 23+ questionnaire was sent out to 9,394 live born children within the ALSPAC cohort (60.3% of total sample). As of 30th of September 2016 4,222 completed

questionnaires had been returned (45% of those sent). For further information on the ALSPAC 'Young People' sample, please see the cohort profile paper (Boyd et al., 2013).

Note that 3 of the 4,222 completed questionnaires belong to children from triplet or quadruplet pregnancies, all of whom are in the core sample. For reasons of confidentiality the data from these questionnaires are not available. All variables have been set to -11 for these triplets and quadruplets.

Format of this documentation

The bulk of this documentation consists of the text of the questionnaire as it was sent and frequency tables of the variables on the data file. These are inserted section by section after the relevant text. Where any editing has occurred, a description has been added before the relevant frequency tables. The algorithms used to create derived variables are also included where appropriate.

Release file version history

Release version 1a – September 2017; The first version of the release file.

Release version 2a – March 2019; Additional derived variables have been added to the release file. These include: occupational classes derived from text data, based on the National Statistics Socio-Economic Classification (NS-SEC; variables YPC2491, YPC2492 and YPC2493); and composite measures for each of the well-being questionnaires in section C (variables YPC0600 to YPC0611). Additional details of derivations are provided below, alongside the relevant variables.

Introduction

This questionnaire is for completion by the study young person.

In answering these questions you will be helping Children of the 90s researchers who have been involved in putting this questionnaire together. The data you provide will be available to researchers across the world and will help in answering important questions on human development, health and disease.

Please remember that your answers to all these questions are confidential and will be processed using a unique ID number. All your personal details will be removed by Children of the 90s staff and researchers will not be able to link your answers back to you. Your data will only be shared with qualified researchers for research that has been approved by Children of the 90s.

Some questions may seem very similar to each other. This is because the combination of answers gives a clearer picture than one single answer. There may be questions that seem a bit strange and are not applicable to you because they are concerned with specific feelings or problems. We would be very grateful if you would try to answer all the questions but we understand if there are questions that you either prefer not to answer or are unable to answer. Please just leave these questions blank. There are no right or wrong answers.

If you require assistance in completing this questionnaire, please contact us via the details enclosed and we will be happy to make the necessary arrangements.

If you do not wish to complete this questionnaire, please leave it blank and return it to us in the prepaid envelope provided. We will then know not to send you any more reminders.

Thank you for taking the time to complete this questionnaire. To say thanks for taking part, we'll send you a £10 shopping voucher which you can spend online or on the high street. Whether you return your questionnaire complete or incomplete, we will also enter you into a prize draw to win one of three iPad Air 2 tablets.

To be entered into the prize draw we must have received your questionnaire by 5pm on Tuesday 3rd May 2016. We will contact winners within two weeks using the contact details we have on our database. Prize winners will receive their prizes up to six weeks after the draw has been held.

Filling in the Questionnaire

Please use a **black** pen. To answer questions simply put a cross in the circle/box which is most accurate in your opinion, like this:

If you make a mistake, shade the circle/box in like this:

then cross the correct circle/box.

If you are answering questions which ask you to give further details, please make sure you write inside the boxes. If possible, please use CAPITAL LETTERS.

When writing numbers inside boxes, please don't touch the sides of the box.

If you do not want to answer a question, or if it does not apply to you, leave it blank.

There are no right or wrong answers.

There is a blank space available at the back of the questionnaire if you need additional space. If you use this sheet, please clearly indicate the question number you are answering.

Section B: Sexual Experience

The questions in this section are about your sexual experience and activity. We know that this is a sensitive topic and therefore want to reassure you that all your answers are completely confidential. Some of the questions that follow use terms like sexual partners and sexual intercourse, which are explained below. Please be sure to read the definitions below before answering the questions.

Genital area - A man's penis or a woman's vagina (the sex organs)

Vaginal sex (vaginal intercourse) - A man's penis in a woman's vagina

Oral sex (oral sexual intercourse) - A (woman's/man's) mouth on the partner's genital area

Anal sex (anal sexual intercourse) - A man's penis in a partner's anus (rectum or back passage)

Sexual intercourse or 'having sex' - This includes vaginal, oral or anal intercourse

Partners or sexual partners - People who have sex together - whether just once or a few times, or as regular partners or as married partners

Consensual sex - Consensual sex is sex that both people have agreed (consented) to after the age of 13

Sexual experience - Sexual experience is any kind of contact with another person that you felt was sexual (it could be just kissing or touching, or intercourse or any other form of sex)

Section C: Wellbeing

We would now like to ask some questions about your positive mental states such as happiness, life satisfaction, and meaning in life. Increased wellbeing is linked with better health, longevity, and success in life. By understanding more about what causes wellbeing as well as mental illness, we can understand how to promote health better.

Derived variables for the well-being section

Several measures of well-being were included in this questionnaire. Details of these are given below, along with how the derived variables were constructed.

Note that all composite measures were initially created using just individuals with complete data. For individuals who completed more than half of all items in the scale (but still had some missing data) a mean score for each derived variable was calculated. For composites requiring a mean score, this mean value was imputed as the individual's score for that scale. The composites requiring a summed score, this mean score was multiplied by the number of items in the scale, in order to rescale the mean score to a sum score. This explains why many of the summed scales include non-integer numbers.

1) ONS Personal Wellbeing Indicators (Variables YPC0450 to YPC0480)

This scale is comprised of 4 items, with each item having 11 possible responses, from '0' (meaning 'not at all') to '10' (meaning 'completely'). These items are traditionally not combined into an overall composite by the ONS (Office for National Statistics), so no derived variables have been created for this scale.

For additional information from the ONS regarding this scale, see:

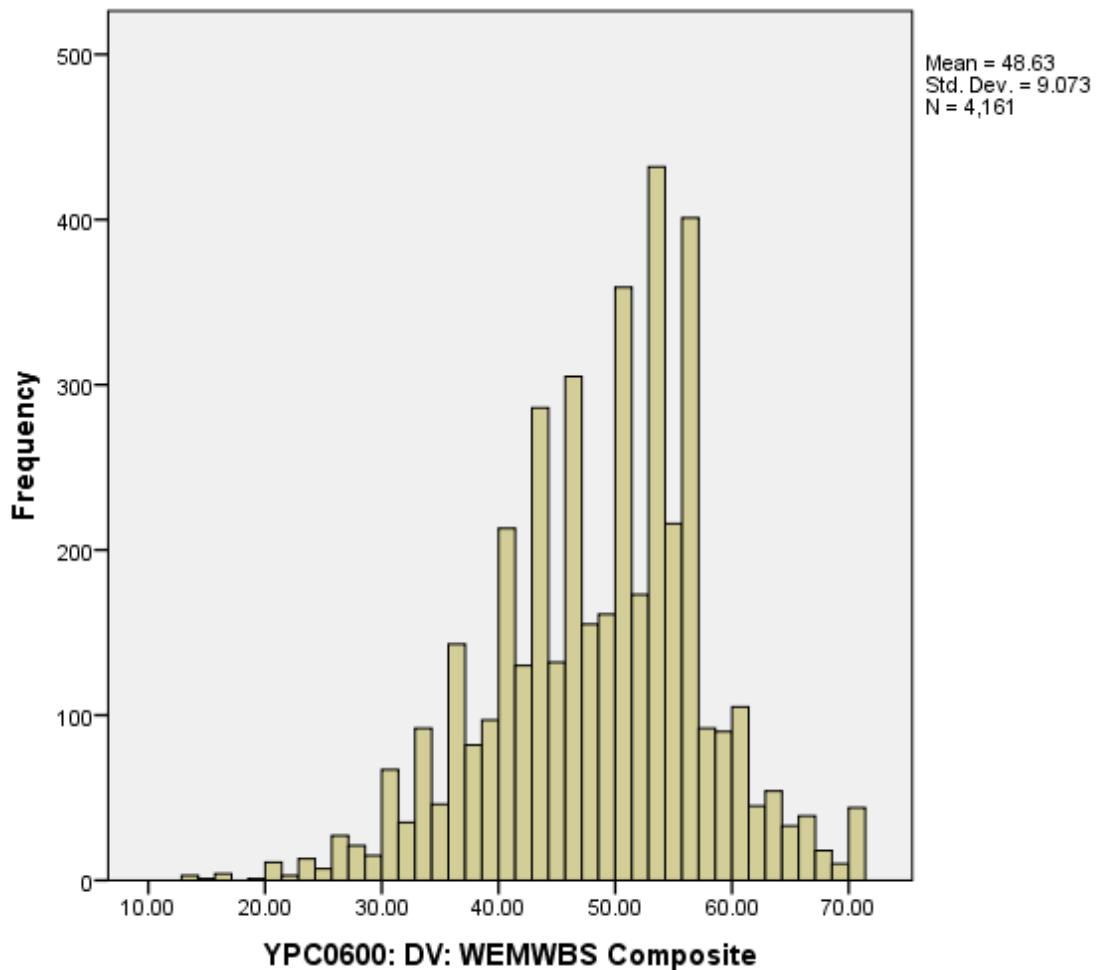

<https://www.ons.gov.uk/peoplepopulationandcommunity/wellbeing/methodologies/personalwellbeingsurveyuserguide>

2) Warwick-Edinburgh Mental Wellbeing Scale (WEMWBS: Variables YPC0490 to YPC0503)

This scale is comprised of 14 items, with each item having 5 possible responses, summed to provide a single score ranging from 14-70. Note that the values in the raw variables in the WEMWBS go from 0 to 4, so to create the composite variable these were recoded from 1 to 5. The derived variable is variable YPC0600.

For additional information on the WEMWBS, see:

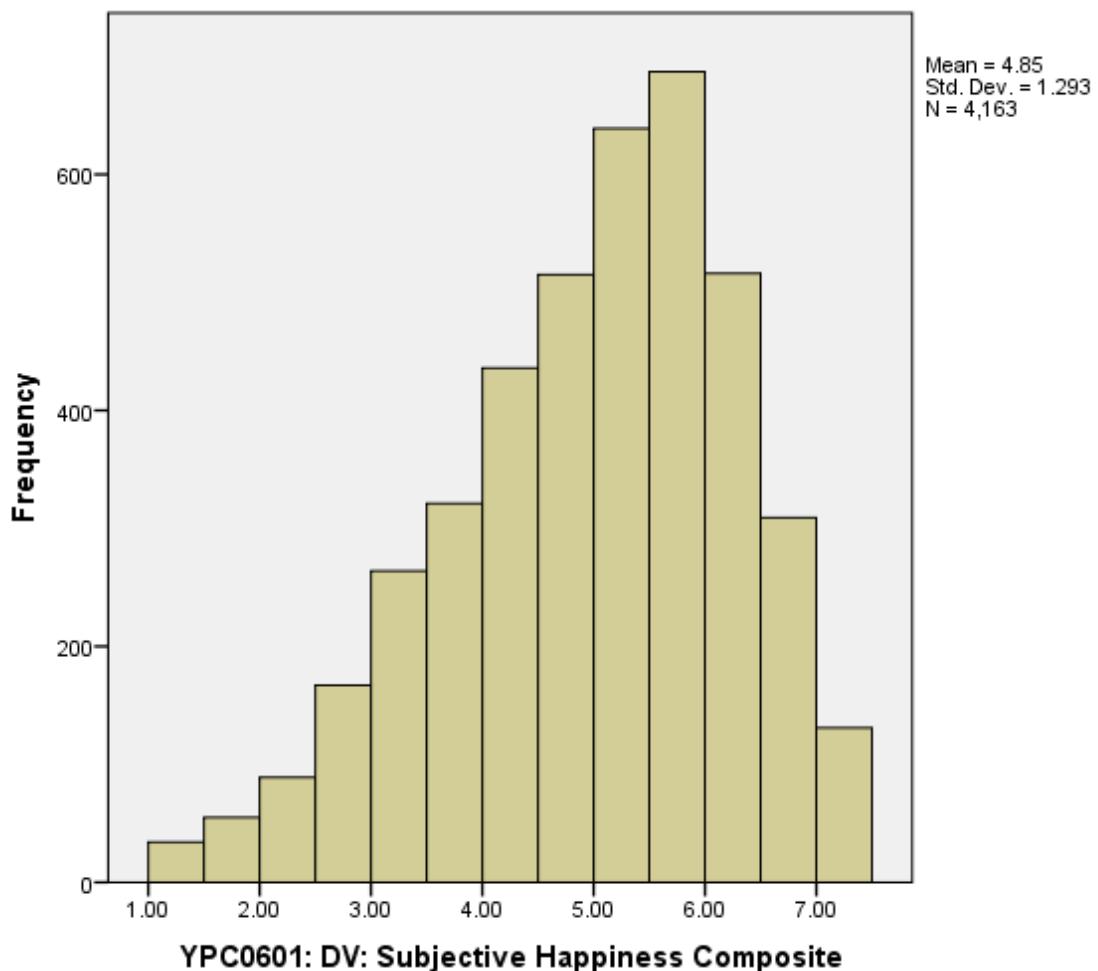

<https://warwick.ac.uk/fac/sci/med/research/platform/wemwbs/>

3) Subjective Happiness Scale (Variables YPC0510 to YPC0521)

This scale is comprised of 4 items, with each item having 7 possible responses (1-7). After reverse-scoring the fourth item (YPC0521), the composite is simply the mean of the four items. The derived variable is variable YPC0601.

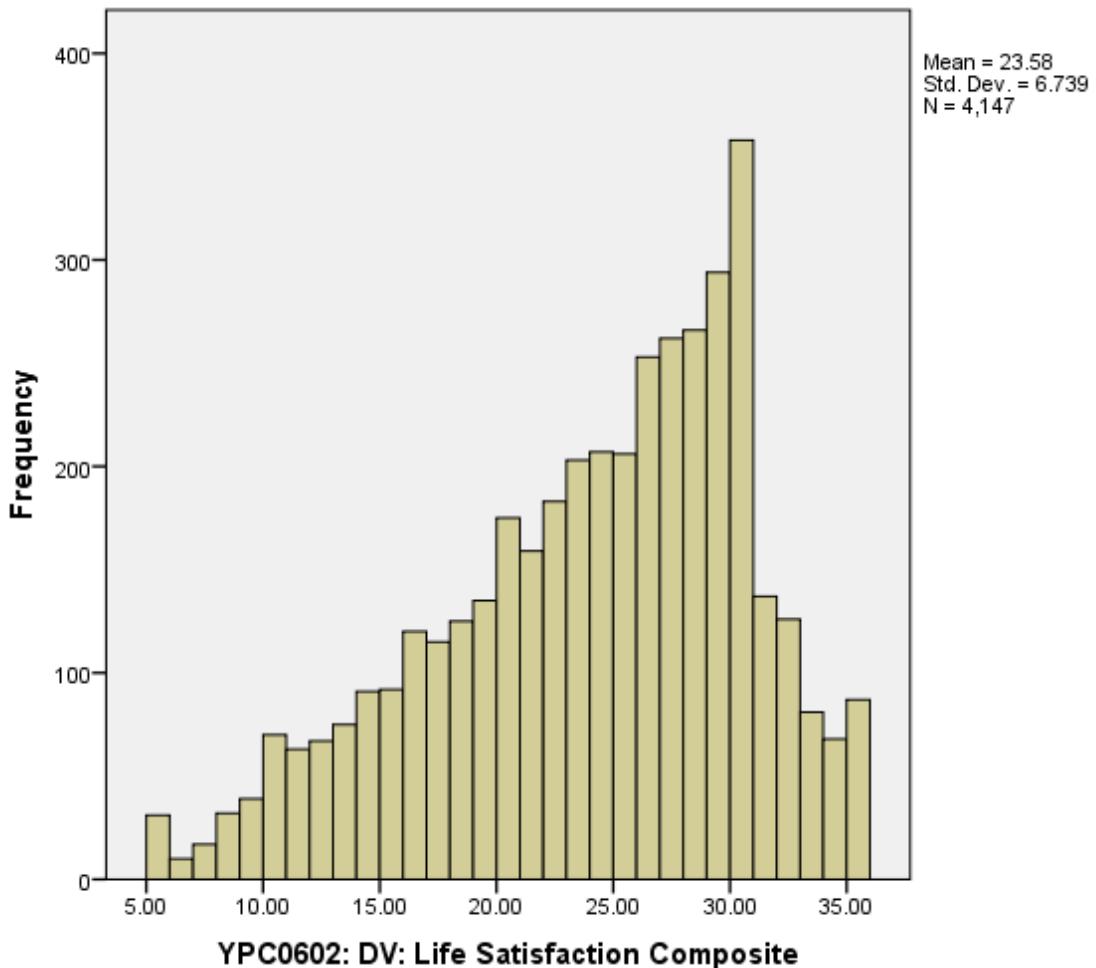

For additional information on the Subjective Happiness Scale, see:
<http://sonjalyubomirsky.com/subjective-happiness-scale-shs/>

4) Satisfaction with Life Scale (Variables YPC0530 to YPC0534)

This scale is comprised of 5 items, with each item having 7 possible responses (1-7). These items are summed to provide a single score ranging from 5-35. The derived variable is variable YPC0602.

For additional information on the Satisfaction with Life Scale, see:
<http://labs.psychology.illinois.edu/~ediener/SWLS.html>

5) Meaning in Life Scale (Variables YPC0535 to YPC0544)

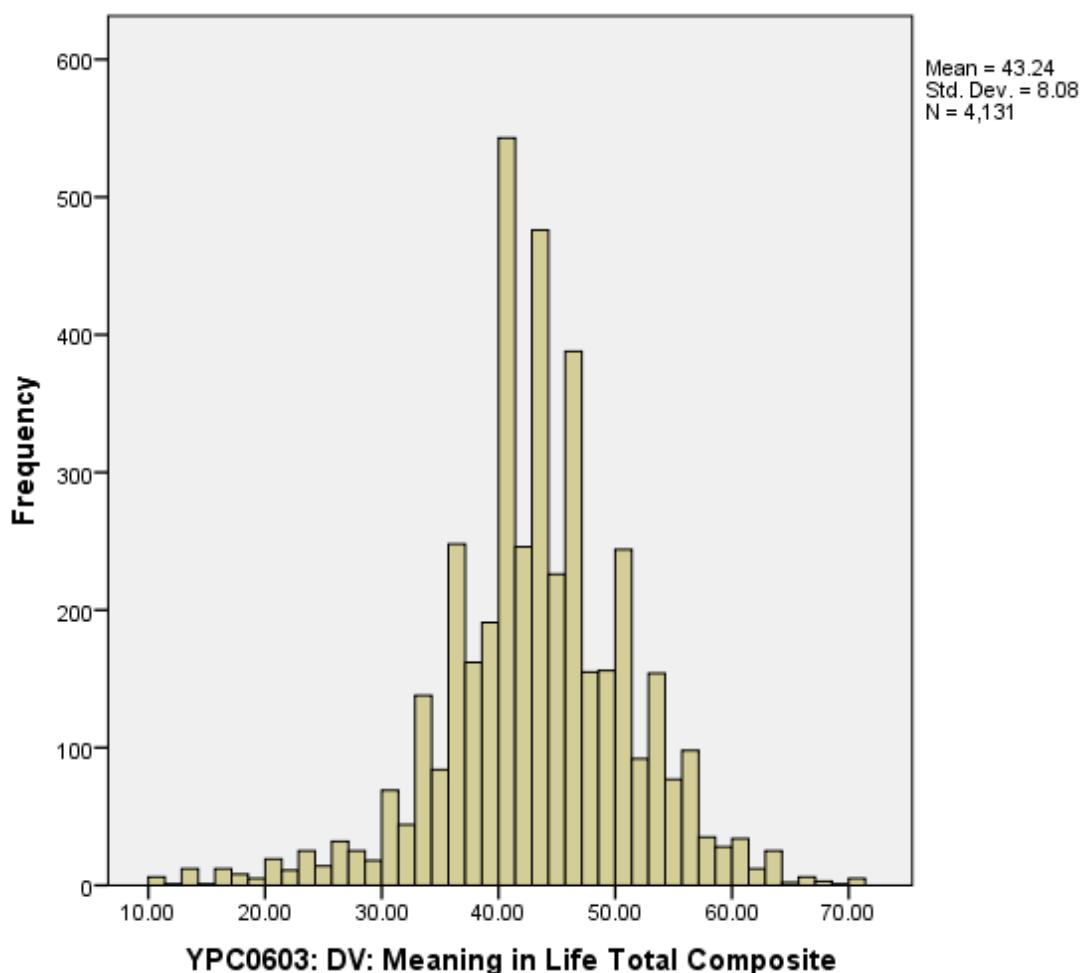

This scale is comprised of 10 items, with each item having 7 possible responses (1-7). The items are used to create an overall composite variable, plus two subscales: 'presence' subscale and 'search' subscale. Prior to creating the composite variables, item #9 (variable YPC0543) has to be reverse-coded.

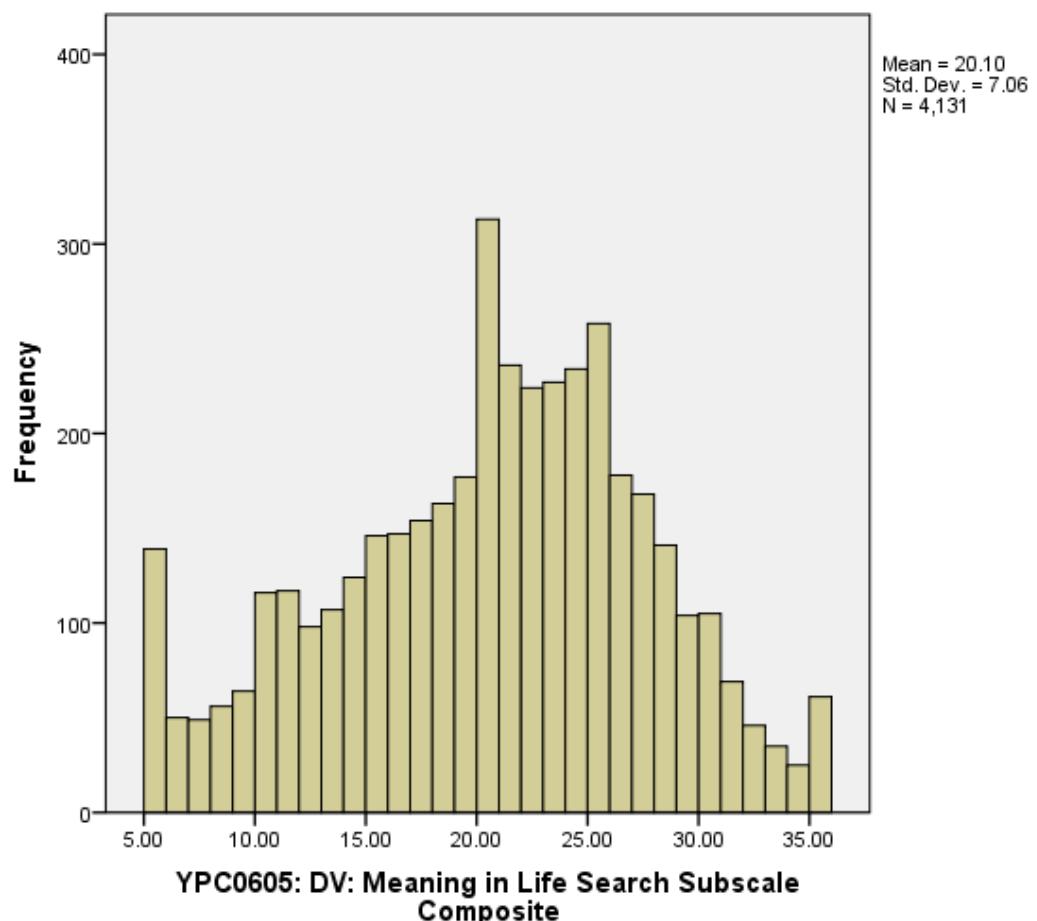

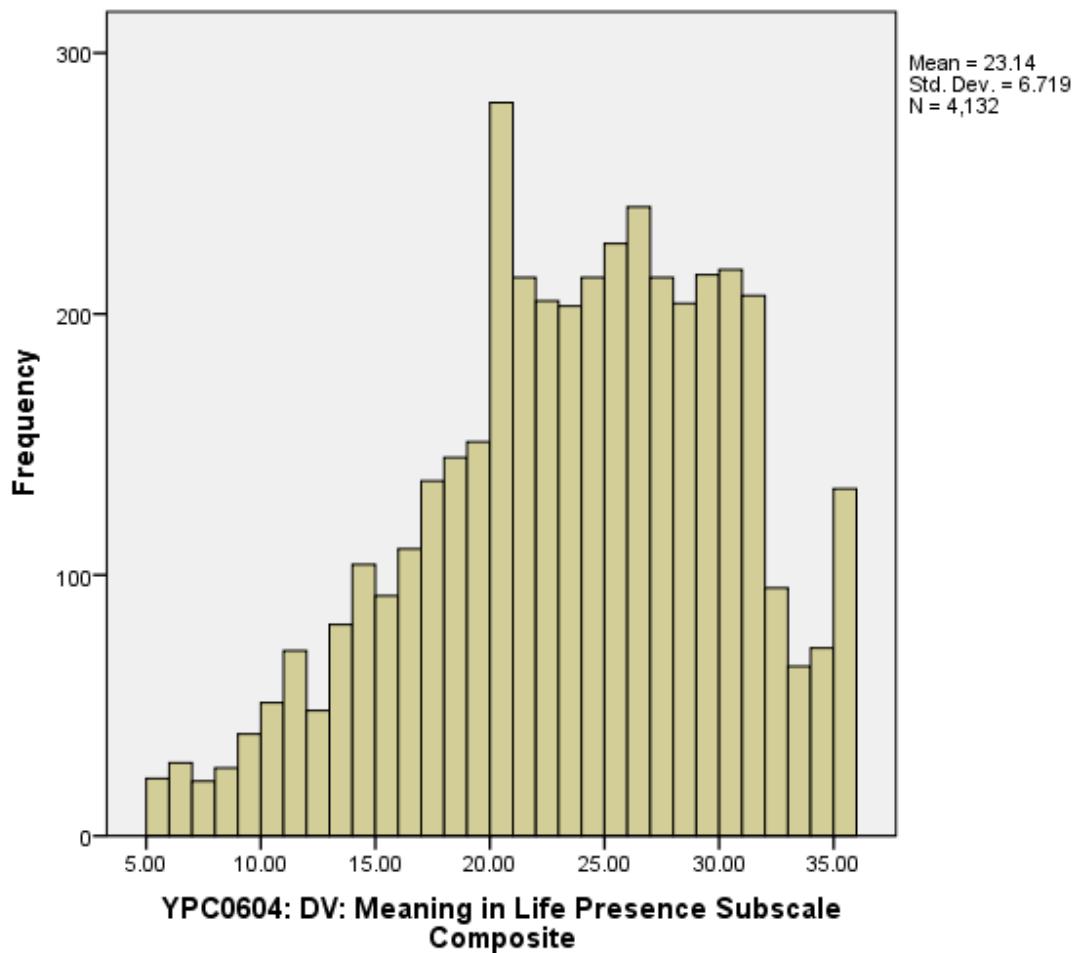

The derivations for these variables are:

- Meaning in Life total composite (YPC0603): Sum of all items in the scale (with item #9 (YPC0543) reverse-coded), for a total score between 10 and 70.
- Meaning in Life Presence subscale (YPC0604): Sum of items #1 (YPC0535), #4 (YPC0538), #5 (YPC0539), #6 (YPC0540) and #9 (YPC0543: reverse-coded), for a total score between 5 and 35.
- Meaning in Life Search subscale (YPC0605): Sum of items #2 (YPC0536), #3 (YPC0537), #7 (YPC0541), #8 (YPC0542) and #10 (YPC0544), for a total score between 5 and 35.

For additional information on the Meaning in Life Scale, see:

<http://www.michaelfsteger.com/wp-content/uploads/2013/12/MLQ-description-scoring-and-feedback-packet.pdf>

6) Basic Psychological Needs Scale (Variables YPC0550 to YPC0570)

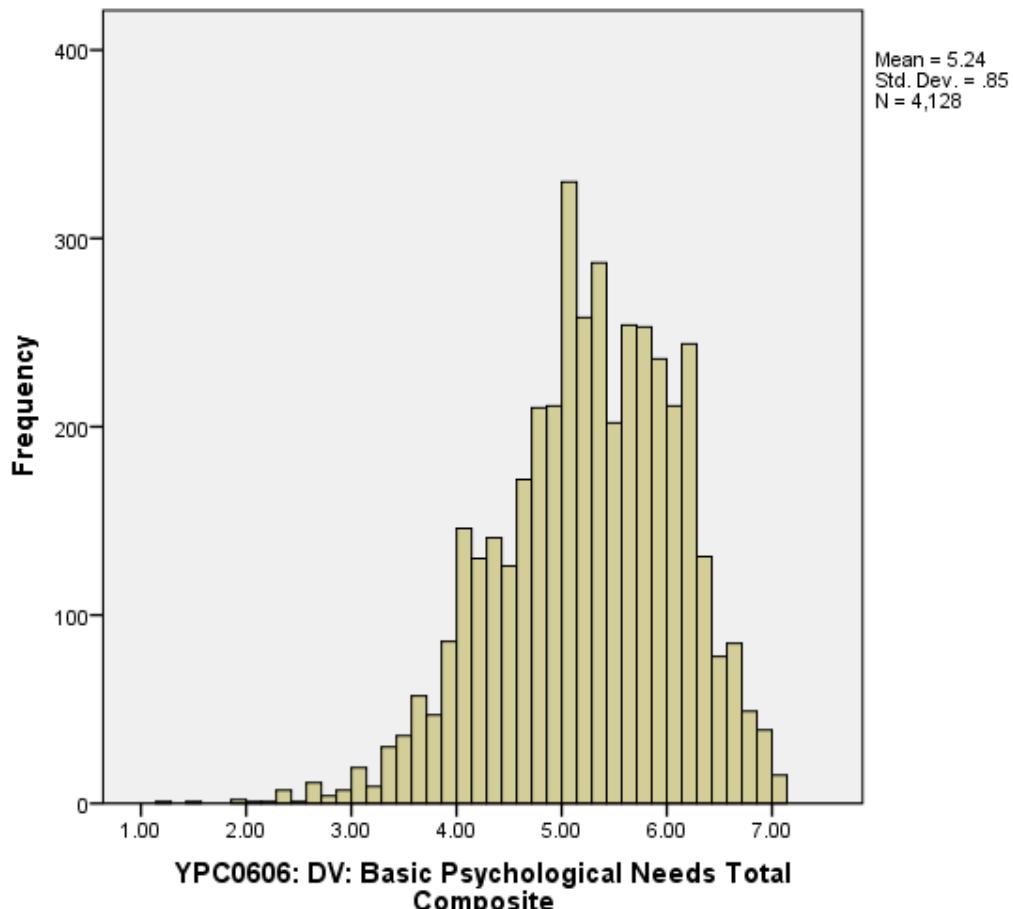

This scale is comprised of 21 items, with each item having 7 possible responses (1-7). The items are used to create an overall composite variable, plus three subscales: 'autonomy subscale', 'competence' subscale, and 'relatedness' subscale. Items denoted by an 'R' are worded in a negative way, so have to be reverse-coded before constructing the derived variables.

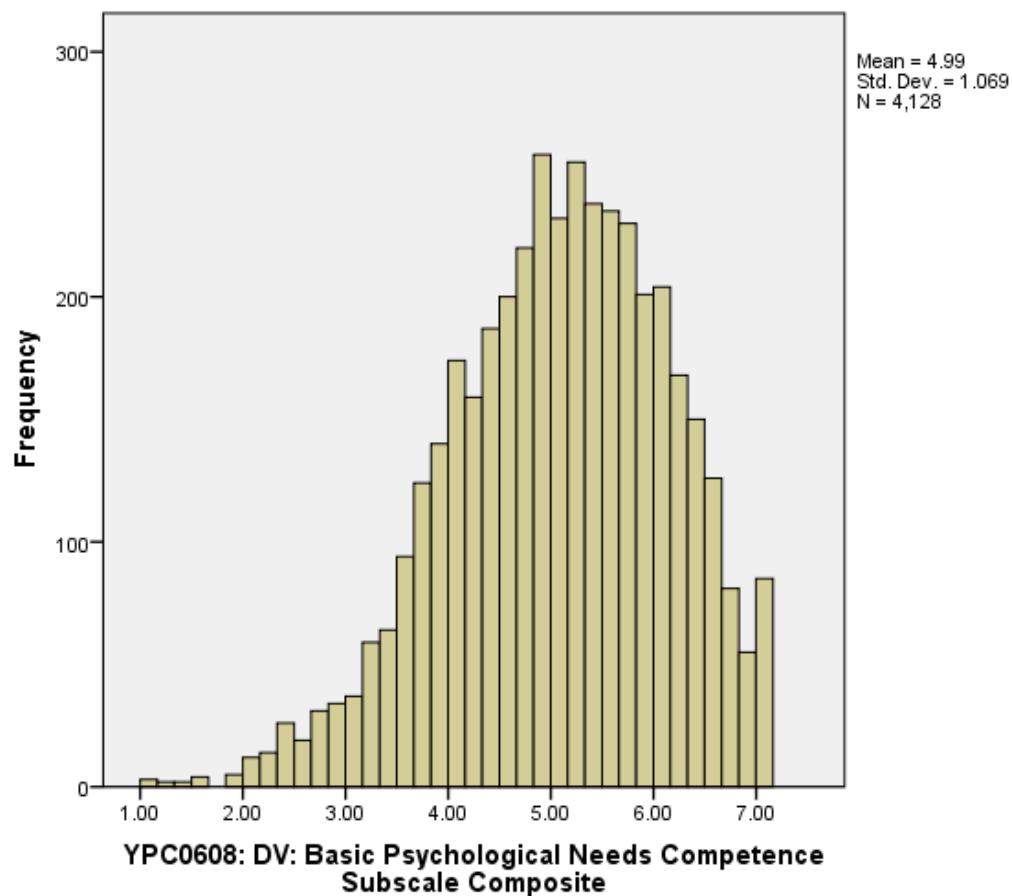

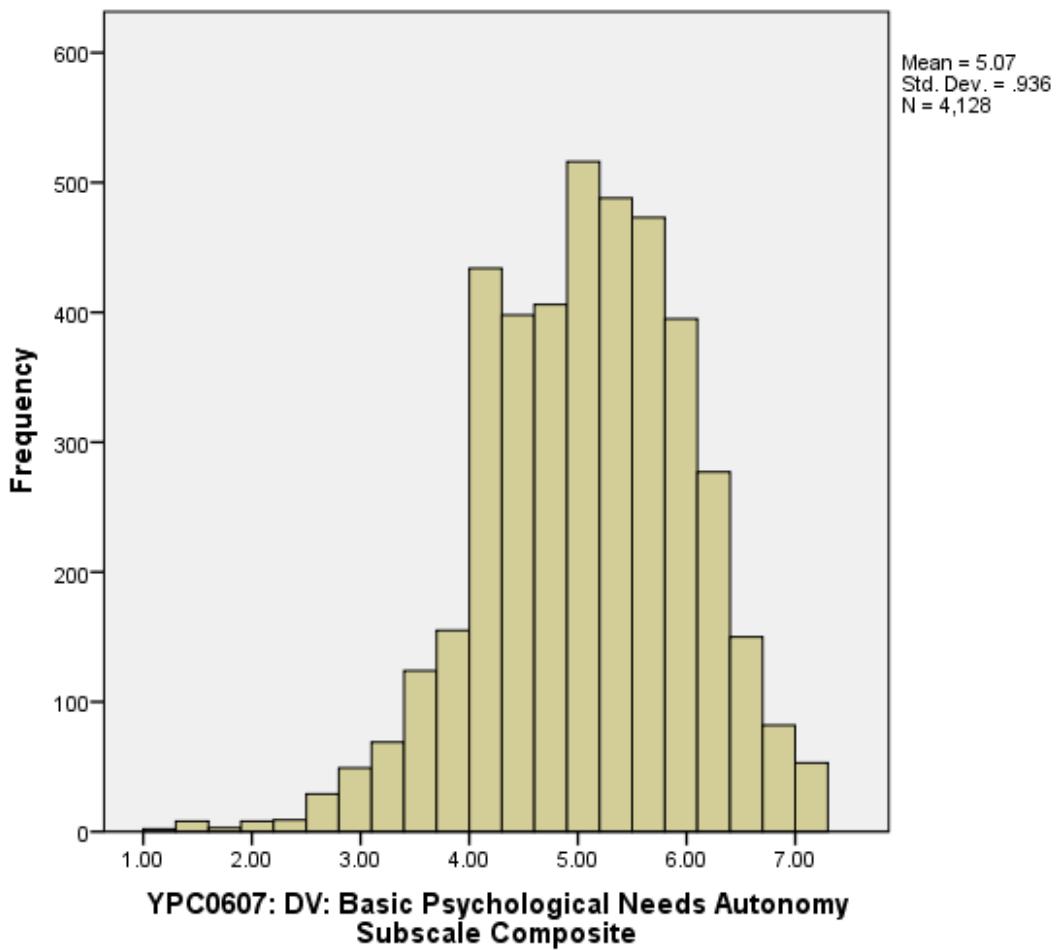

The derivations for these variables are:

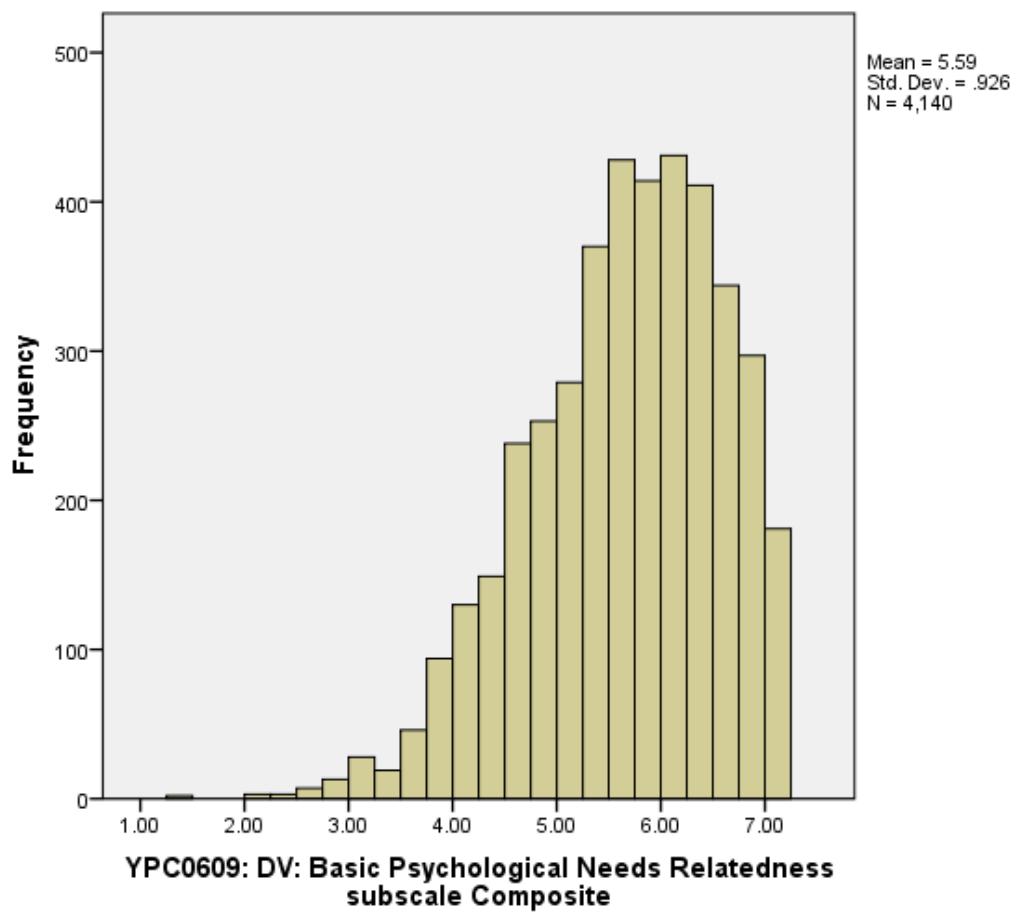

- Basic Psychological Needs total composite (YPC0606): Average of all items in the scale, with variables YPC0552, YPC0553, YPC0556, YPC0560, YPC0564, YPC0565, YPC0567, YPC0568 and YPC0569 reverse-coded.
- Basic Psychological Needs autonomy subscale (YPC0607): Average of items YPC0550, YPC0553(R), YPC0557, YPC0560(R), YPC0563, YPC0566 and YPC0569(R).
- Basic Psychological Needs competence subscale (YPC0608): Average of items YPC0552(R), YPC0554, YPC0559, YPC0562, YPC0564(R) and YPC0568(R).
- Basic Psychological Needs relatedness subscale (YPC0609): Average of items YPC0551, YPC0555, YPC0556(R), YPC0558, YPC0561, YPC0565(R), YPC0567(R) and YPC0570.

For additional information on the Basic Psychological Needs Scale, see:

<http://selfdeterminationtheory.org/basic-psychological-needs-scale/>

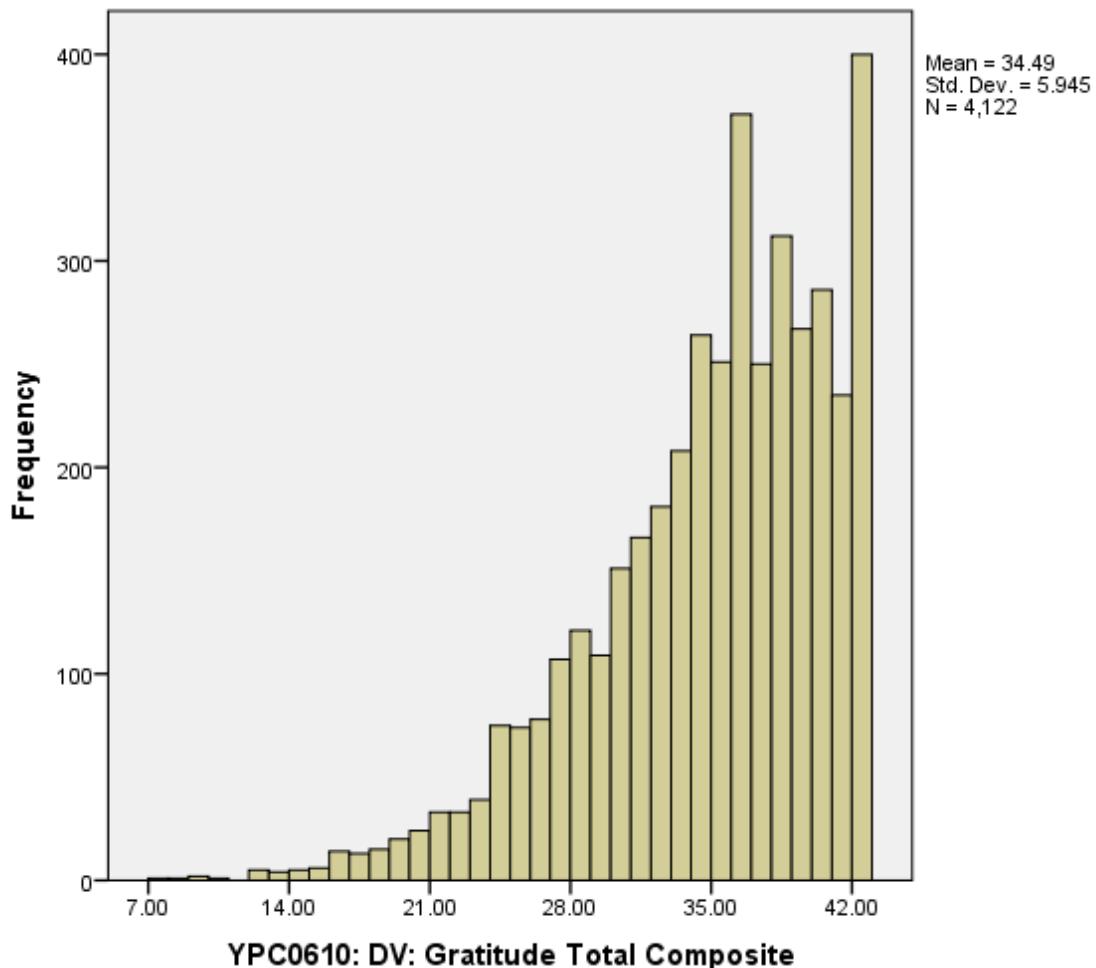

7) *Gratitude Questionnaire (Variables YPC0580 to YPC0585)*

This scale is comprised of 6 items, with each item having 7 possible responses (1-7). After reverse-coding items #3 (YPC0582) and #6 (YPC0585), these variables are summed to provide a single score ranging from 6-42. The derived variable is variable YPC0610.

For additional information on the Gratitude Questionnaire, see:

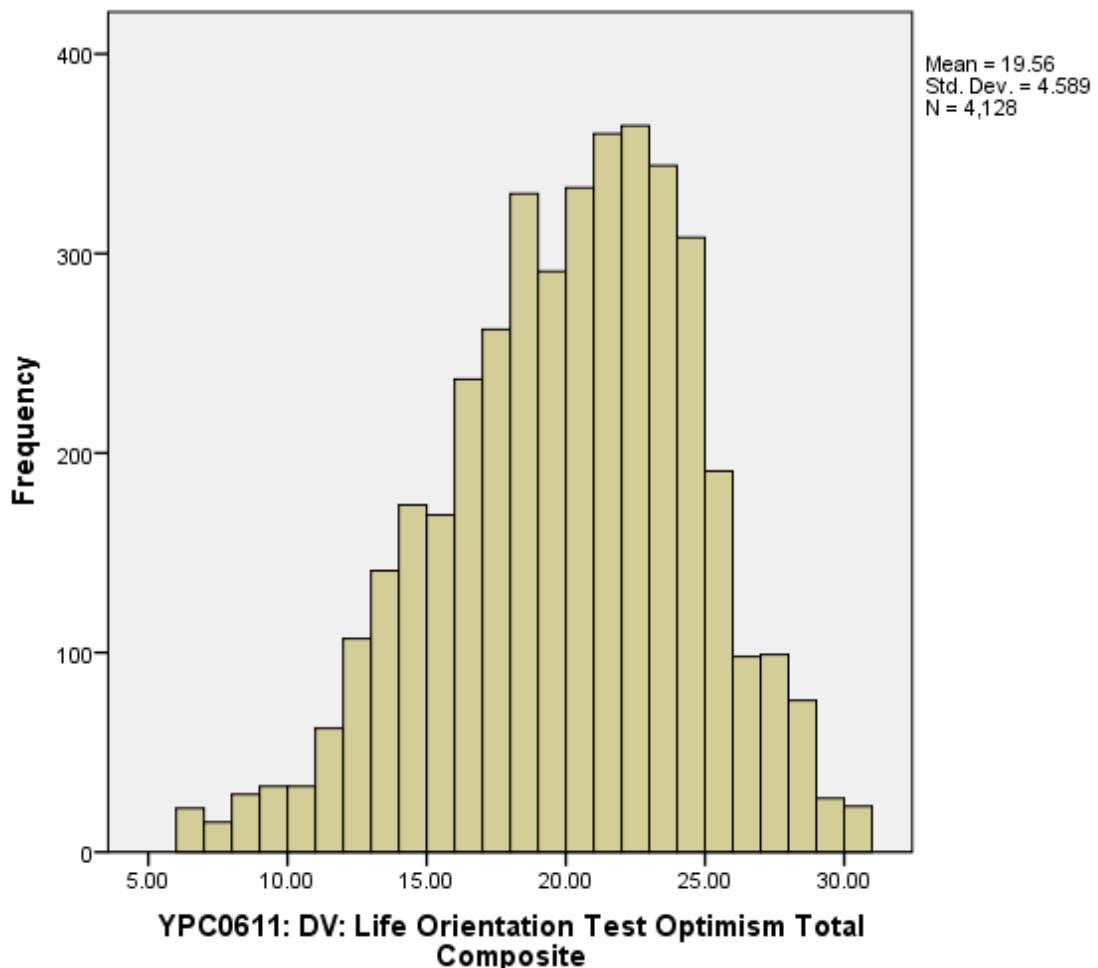

<http://local.psy.miami.edu/faculty/mmccullough/gratitude/2-Page%20Blurb%20on%20the%20Gratitude%20Questionnaire.pdf>

8) Life Orientation Test-Revised (Variables YPC0590 to YPC0599)

This scale is comprised of 10 items, with each item having 5 possible responses (1-5). Items #2 (YPC0591), #5 (YPC0594), #6 (YPC0595) and #8 (YPC0597) are filler questions and are not used in creating the composite variable. After reverse-coding items #3 (YPC0592), #7 (YPC0596) and #9 (YPC0598), the remaining items are summed to provide a single score ranging from 6-30. The derived variable is variable YPC0611.

Section D: Eating Behaviour

We would like to ask you some questions about how you eat and the things that might affect your eating behaviour. The information could help us to understand how we can promote healthy eating. Some questions may seem very similar to each other. This is because the combination of answers gives a clearer picture than one single answer.

Section F: Brothers and Sisters

As you may already know, Children of the 90s is interested in the health and wellbeing of your whole family. The questions below help us build an accurate picture of your wider family structure including biological half, step, foster and adopted brothers and sisters. We have asked these questions before but family structures change so it is important that we keep this information updated.

- F1) Do you have any brothers and sisters? Please include any brothers and sisters who have passed away.

Yes No → If no, please go to section G

- F2) How many brothers and sisters do you have?

We have included space for you to tell us about up to 6 brothers and sisters below. If you have more than 6, please use the blank sheet at the back of the questionnaire and clearly indicate you are answering question F3.

- F3) What is the date of birth, gender and your relationship to each of these brothers and sisters?

a. 1st brother or sister:

Section H: Mental Health

The following questions are about how you might have been feeling or acting recently. We would be very grateful if you could try to answer all of the questions but we understand if there are questions that you either prefer not to answer or are unable to answer. We have asked these questions many times before but it is important to ask them again to see how your answers change as you get older.

H1) Please cross one option on each line to show how much you have felt or acted this way in the **past two weeks**.

Section I: Traumatic Experiences

This section is about how you are treated by other people and how you treat others, including questions about different types of bullying and traumatic experiences. We understand that these questions are extremely sensitive and understand if there are questions that you either prefer not to answer or are unable to answer. All of your answers are completely confidential.

Direct bullying - this refers to harming others by directly getting at them.

Over and over again some people:

- have their things stolen
- are threatened or blackmailed or get called nasty names
- have nasty tricks played on them
- are hit, shoved around or beaten up

I1) How often have these things **happened to you in the last 6 months?**

Never	<input type="radio"/> 0	Not much (1-3 times)	<input type="radio"/> 1
Quite a lot (more than 4 times)	<input type="radio"/> 2	A lot (at least once a week)	<input type="radio"/> 3

I2) How often have **you** done these things to others in the **last 6 months?**

Never	<input type="radio"/> 0	Not much (1-3 times)	<input type="radio"/> 1
Quite a lot (more than 4 times)	<input type="radio"/> 2	A lot (at least once a week)	<input type="radio"/> 3

Indirect bullying - this refers to people trying to damage relationships between friends and destroy status in groups.

Over and over again some people:

- get deliberately left out of get-togethers, parties, trips or groups
- have others ignoring them, not wanting to be their friend anymore, or not wanting them around in their group
- have nasty lies, rumours or stories told about them
- have others trying to get them to do something they didn't want to

The rest of this section asks some very sensitive questions about things that have happened to you in your life so far, including very traumatic or stressful events. Again we would like to remind you that you do not have to answer these questions, and we understand if there are questions that you either prefer not to answer or are unable to answer.

I7) When I was **growing up**:

	Never true	Rarely true	Sometimes true	Often true	Very often true
a. I felt loved	<input type="radio"/>				
b. People in my family hit me so hard that it left me with bruises or marks	<input type="radio"/>				
c. I felt that someone in my family hated me	<input type="radio"/>				
d. Someone molested me (sexually)	<input type="radio"/>				
e. There was someone to take me to the doctor if I needed it	<input type="radio"/>				

The next questions are about **relationships that you have been in**.

I8) Since I was **sixteen**:

Section J: Teeth

We are interested in the health of your teeth and mouth. We have asked some questions about your teeth before and it is useful to ask them again to see how things change over time.

Visiting your dentist and tooth decay

J1) When was the **last time** you went to the dentist?

- | | |
|---------------------------|-------------------------|
| In the past year | <input type="radio"/> 1 |
| Between 1 and 2 years ago | <input type="radio"/> 2 |
| More than 2 years ago | <input type="radio"/> 3 |
| Never been | <input type="radio"/> 0 |
| Don't know | <input type="radio"/> 9 |

J2) What is the reason you **usually** go to the dentist?

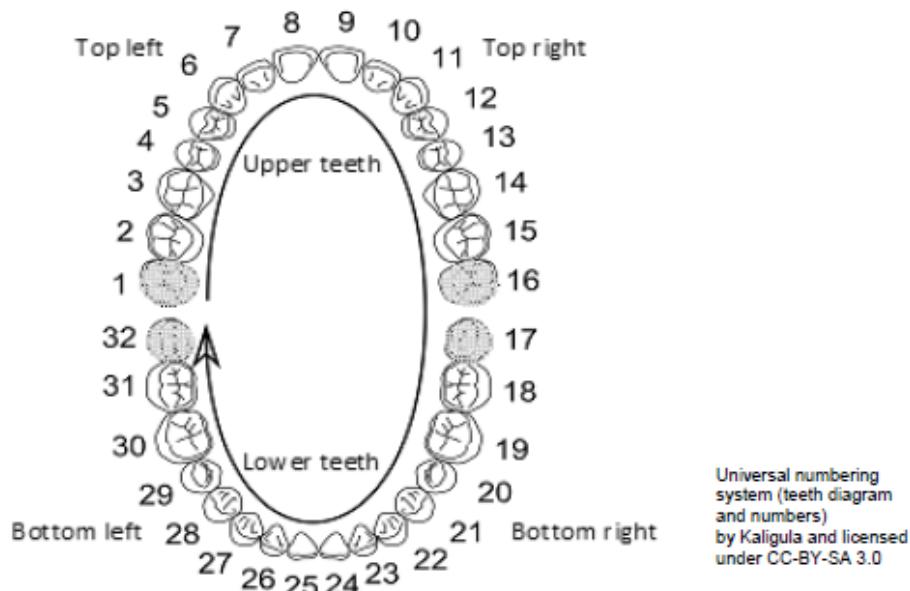

- | | |
|---|-------------------------|
| Regular routine check-ups (up to every 2 years) | <input type="radio"/> 1 |
| Occasional check up (less than every 2 years) | <input type="radio"/> 2 |
| Only when I have trouble with my teeth | <input type="radio"/> 3 |
| I never go to the dentist | <input type="radio"/> 0 |
| Don't know | <input type="radio"/> 9 |
| Another reason | <input type="radio"/> 4 |

J3) Were any of your teeth taken out for braces/traintracks/orthodontics?

Yes 1 No 0

Third molars (wisdom teeth)

J5) Your wisdom teeth are at the very back of your mouth. Not everyone has them but, if you do, you will have the teeth shaded in the diagram at the back on each side (numbers 1, 16, 17 and 32). If you're unsure about these questions, please leave them blank.

a. Cross the boxes next to all wisdom teeth that **haven't** come through.

1 (top left) 16 (top right) 17 (bottom right) 32 (bottom left)

b. Cross the boxes next to all wisdom teeth which **have** come through and have **not** caused you problems.

1 (top left) 16 (top right) 17 (bottom right) 32 (bottom left)

c. Cross the boxes next to all wisdom teeth which **have** come through and **have** caused you problems or pain, even if these teeth have now been removed.

1 (top left) 16 (top right) 17 (bottom right) 32 (bottom left)

J6) How many times:

	Never	1	2-3	3-4	5 or more	Don't know
--	-------	---	-----	-----	--------------	---------------

a. Have you had pain from your wisdom teeth? 1 2 3 4 5

b. Have you had a course of antibiotics for problems with your wisdom teeth? 1 2 3 4 5

c. Have you had facial swelling from your wisdom teeth? 1 2 3 4 5

J7) Have you ever had to stay in a hospital bed, either during the day or overnight, because of problems from your wisdom teeth?

Yes 1 No 0 Don't know 9

J8) Have you had any wisdom teeth removed?

Yes 1 No 0 Don't know 9

J9) Have you had any other treatment to your wisdom teeth when they were causing pain, like cleaning around the gum or removing part of the gum?

Yes 1 No 0 Don't know 9

Derived Variables for Occupation Variables

Questions I5a, I5b and I5c were open text questions in which the young person listed their occupation, business/industry and job responsibilities, respectively. These text responses were coded into the National Statistics Socio-Economic Classification (NS-SEC) categories, as used by the Office for National Statistics (ONS). For additional information about these classifications, including the hierarchy, derivation and occupation coding tool, see:

<https://www.ons.gov.uk/methodology/classificationsandstandards/otherclassifications/nationalstatisticssocioeconomicclassificationssrebasedonsoc2010>

All text responses were assigned a Social Occupation Classification (SOC) code based on their job title, industry and role (see: https://onsdigital.github.io/dp-classification-tools/standard-occupational-classification/ONS_SOC_occupation_coding_tool.html).

Based on their job title and responsibilities, individuals were also assigned an 'employment status', with the following groups: Employer; Self-employed; Manager; Employee with supervisory responsibilities; and Employee.

Based on these SOC codes and employment status, the 'reduced' derivation method was used to generate the NS-SEC codes (note that the 'reduced' derivation was used because the coding process did not include the number of employees at their place of work, which is needed for the 'full' derivation method).

This process resulted in three derived variables:

- YPC2491 – This variable includes all seven occupational classes referred to in the NS-SEC guide.
- YPC2492 – This variable collapses the seven occupational categories into five classes (see table 3 in the first link above for further details).
- YPC2493 – This variable details the employment status code (Employer, self-employed, manager, etc.) of each individual. Note that due to the small sample size who were coded as 'employer' (<5), this category has been combined with the 'self-employed' category. Note also that this variable is based solely on the respondent's job title and responsibilities, so may not be completely accurate if relevant information was missing.

As per ONS guidance, students and unemployed individuals were not given an NS-SEC classification.

The variable YPC2750 indicates the 169 respondents for which 'age at completion' (YPC2650) was based upon receipt date of their paper questionnaire, rather than completion date written in the questionnaire (YPC2600 and YPC2601). This would occur either if completion date was missing from the questionnaire, or completion date was incomprehensible. Respondent age at completion may therefore carry greater error for these individuals; although receipt date should only be a few days after completion date. However, if participants completed a questionnaire then forgot to post it quickly, or if the returned questionnaire took a while to be scanned by ALSPAC, the receipt date may not match completion date.
